Vol. 3, no. 1

September, 1990.

Welcoming students back for another year and greeting new students for the first time is one of the more pleasant tasks that I have to perform. The Services for Disabled Students is already in full operation concentrating on those material adaptation requests, classroom accessibility needs and the usual demands of registration, course change and orientation.

This first newsletter is packed full of information, special deadlines and announcements of workshops, etc. Please read your copy carefully. It is available, upon request, in either braille or on tape.

We are fortunate to have an experienced and dedicated staff who are looking forward to a busy, innovative and exciting year. In addition to other duties and responsibilities all staff have specific areas of expertise: Leo Bissonnette will be offering refresher and introductory courses on the Optical Scanner, Brailier and Word Processors, while continuing with research into the latest technology and student advising. Doreen Ferland will be concentrating on adapting classroom materials, texts, etc. onto tape and braille; Angela Ghadban will be coordinating the computer room at Loyola as well as the resources on learning disabilities and Nelly Trakas will be coordinating the daily operation of the S.G.W. centre along with ASL programme and putting together this newsletter. Other services that we provide are listed in our literature.

Our collective job is to provide you, the student, with a centre of practical support and a belief in your ability to pursue your goals at Concordia. We hope to see old friends once again and meet many new students early on in the term.

ORAL INTERPRETING FOR THE HEARING IMPAIRED

We are pleased to announce that an Oral Interpreting course will be given in the fall of 1990 at the CEGEP du Vieux Montréal.

COURSE TITLE:

Oral Interpreting I

DESCRIPTION OF COURSE:

An introductory course, intended to provide the student with the basic skills, knowledge and attitudes needed for oral interpreting. Professional aspects of interpreting will be highlighted. Oral hearing impaired adults and professional interpreters will be available to provide students with the benefit of their experience. Instructional strategies include panel discussions, formal lectures, videotapes, role plays and various oral interpreting experiences.

SCHEDULE:

Oral Interpreting I will be held on Thursday evenings, from 7-10 pm, from September 13 to December 13, 1990 inclusive.

COST: \$120.

LOCATION: CEGEP du Vieux Montréal
255 Ontario Street East, corner Sanguinet
near the Berri-UQAM metro or the Sherbrooke metro

Registration is limited. If you are interested in taking Oral Interpreting I, please contact Paul Bourcier at 982-3443 or Eva Basch at 636-0755 as soon as possible.

EVACUATION PROCEDURES - Disabled Students

HALL BUILDING:

- 1 - Disabled persons are to evacuate by the freight elevator unless they are on the 7th floor.**
- 2 - Students who are on the 7th floor are to use the passenger elevators.**
- 3 - All elevators will be manually operated by a fire monitor.**
- 4 - Monitors will assist students to exit from the elevator at the mezzanine level to assemble in the PR Annex at 2100 Mackay.**

NOTE: IF THE FREIGHT ELEVATOR DOES NOT COME OR IS OUT OF ORDER, EXIT AS PER INSTRUCTIONS BELOW.

ALL OTHER BUILDINGS:

Disabled students are to be evacuated by the stairwells with the assistance of monitors or other volunteers.

NOTE: TO ASSIST IN EVACUATION, MANUAL WHEELCHAIRS ARE AVAILABLE IN H-580, AD 121 AND IN THE FIRST AID ROOMS OF THE HALL, NORRIS AND VISUAL ARTS BUILDINGS AS WELL AS IN BOTH HEALTH SERVICES.

EVACUATION HINTS FOR STUDENTS WITH DISABILITIES:

- 1 - Have an evacuation plan and practice it.**
- 2 - Know the location of the exit and alternate exit during an emergency evacuation. Always know of more than one exit.**
- 3 - Instruct co-workers or students on how they can assist you.**

EVACUATION TECHNIQUES:

METHOD 1:

The helper would kneel at the front of the wheelchair and place the person's arms up and over helper's shoulders and across their chest. Helper would then lean forward before raising slowly to full standing position. (*Illustration #1*)

METHOD 2:

If two helpers are needed, use basic SWING CARRY method. Two helpers position themselves next to the wheelchair in order to grasp each other's upper arm or shoulder. (*Illustration #2*). Person being assisted would then place arms firmly around both helpers' necks (*Illustration #3*). The Two helpers lean forward placing the free arm under the individual's legs firmly grasping each other's wrist - working together, both helpers lift, using legs, then carefully step forward. (*Illustration #4 & #5*).

METHOD 3:

Should the stairwell prove too narrow for the above method . . . a different positioning should be used. The person being assisted would be placed on the stairwell landing. One helper would lift at the legs, under the knees, the other under the shoulders with fingers locked across the individual's chest. Helpers, with backs erect, would lift together, raising slowly to standing position, using leg muscles. (*Illustration #6*).

REMEMBER - ALWAYS ASK HOW A PERSON CAN BE CARRIED AND POSITIONED.

NOTE: EVACUATION CHAIRS AND EMERGENCY TELEPHONES ARE BEING STRATEGICALLY PLACED THROUGHOUT THE UNIVERSITY. CHECK WITH S.D.S. FOR EXACT LOCATIONS
